

TEXAS PORTABLE LIGHTING

A Product of Texas Pneumatic Tools, Inc.

TEXAS TOWER

Large Project Light Tower

- 12 – 1000w LED Lights (170,000 lumens/light)
- 2,040,000 Lumens Total
- 65' Height
- Uses 50 amp Power Supply. Just plug into any 15kw generator to run the lights. (240 volt single phase)
- Self-propelled rubber tracks allow the unit to be set up anywhere
- Fastest and easiest set up on the market. Takes only 1 person less than 10 minutes to set up or take down
- 360 degree lighting to cover a large area. 8 of the 12 lights can be positioned to cover 180 degrees, if desired.
- Each set of lights (top & bottom) can be operated individually
- 1 Texas Tower replaces 10 to 12 standard (16' to 20') light towers
- 60 mile per hour wind speed rating

Folded – Self-Propelled Mode or for transportation
